

GHS Karaoke Studio

Legal, Privacy & Ethical Safety Canvas v1.0

1. Data Privacy & Biometric Sovereignty

VOCAL IDENTITY PROTECTION

- **Purpose Limitation:** User voice recordings (biometric data) are processed solely for song generation and are never used to train third-party models without explicit opt-in.
- **Data Minimization:** Raw recordings are stored for a maximum of 30 days post-project completion to allow for revisions, after which they are purged from active servers.
- **Encryption Standards:** All audio assets must be encrypted using AES-256 at rest and TLS 1.3 in transit.

2. Intellectual Property (IP) Framework

OWNERSHIP & COPYRIGHT

- **Human-AI Collaboration:** Since the user provides the "Starting Truth" (original melody/lyrics), the output is classified as a joint work where the user retains primary commercial rights.
- **AI Tools Licensing:** Ensure all music provider APIs (Suno/Udio) are used under commercial-tier licenses to guarantee that users own the generated backing tracks.
- **Attribution:** GHS Studio claims a platform attribution right (e.g., "Produced with GHS Studio") but does not claim ownership of the user's underlying compositions.

3. Ethical Guardrails & Misuse Prevention

DEEFAKE & IMPERSONATION POLICY

- **Prohibited Content:** The platform strictly prohibits the uploading of unauthorized recordings of public figures, celebrities, or third parties for the purpose of creating non-consensual voice clones.
- **Identity Verification:** Implement automated checks to detect high-confidence matches against known celebrity vocal profiles to prevent deepfake production.
- **Digital Watermarking:** Every exported audio file includes an inaudible digital watermark (steganography) identifying the track as "AI-Assisted" and linking it to the originating GHS user ID.

4. Liability & Safety Disclaimers

LEGAL COMPLIANCE

- **Copyright Infringement:** Users are responsible for ensuring their lyrics and melodies do not infringe on existing copyrights. GHS provides a "Similarity Check" tool but offers no legal guarantee.
- **Local Laws:** GHS operates in compliance with the Nigeria Data Protection Act (NDPA) and GDPR standards regarding the handling of personal data.

Core Legal Rule: AI plans, but the human user directs. The system is a tool for expression, and the user remains the legal "author" of the creative intent.
